

Time Terminal

Secure Remote Time Clock Application

Convenient and Robust

Time Terminal is a fast and convenient way to track employee time and labor information. Employees and supervisors can punch and perform job labor transfers from anywhere a device is available. Staff can receive attestation prompts during the start and end of their shifts. Time Terminal user functions are configurable and easy-to-use.

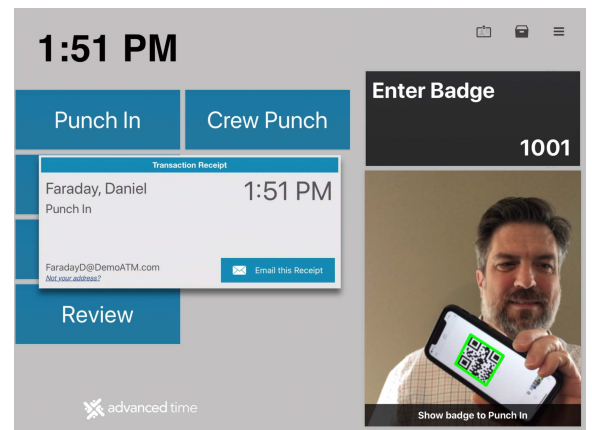

Always Reliable

Time Terminal captures punches in real-time and connects with Attendance on Demand. If an internet connection becomes unavailable, Time Terminal will continue to operate off-line collecting employee transactions. Punches and transfers will remain stored on the device until an internet connection is re-established.

Where you Need It

The iPad offers built in WiFi allowing you to put the device wherever you need it, add a cellular plan and you truly can roam while still being connected to AoD. Easy mounting options allowing you to secure it to a wall or desk, along with the ability to carry it to the next job.

No Touch Punch™

No Touch Punch allows employees to present a QR Code or a barcode that a camera reads and punches in your employee.

Mobile Workforce Ready

Easy-to-use

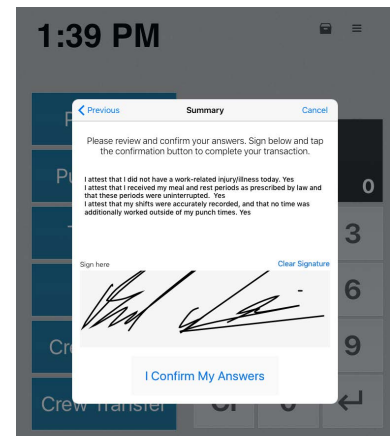

A simple interface empowers your workforce by providing them with quick and convenient access to their information.

Features that Matter

- Punch by Badge
- Touchless Punch using a barcode or QR code.
- Photo Capture - Take a picture with every punch
