

GT4

Set Static IP

Enter Terminal Setup Menu

You need to reboot the clock and press the GEAR button while the clock is booting. Either unplug and plug the clock back in, or go to Admin Options ENTER 1905 twice , and choose the Reboot Clock Option.

Navigate with Arrow Keys

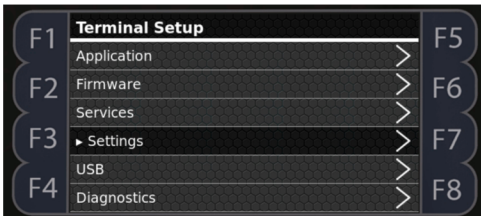

SELECT

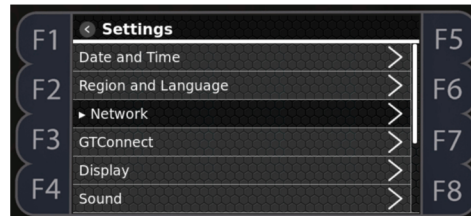

BACK

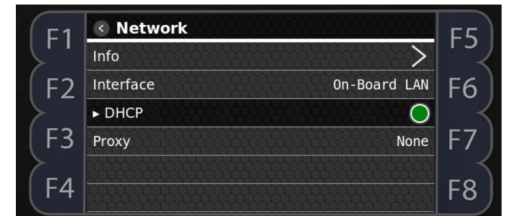

1. Go To Settings

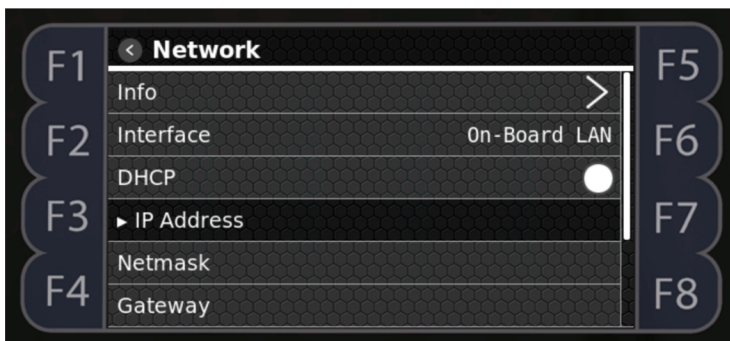

2. Select Network

3. Disable DHCP

4. With DHCP Disabled you can now set your Static Network Information

Select the network item, and use the number pad to enter in the desired entry

5. When completed, press the back button until the clock reboots.
