Bell Schedules

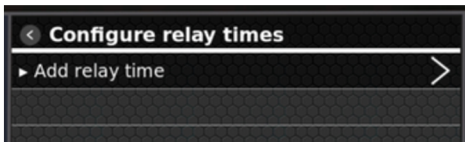

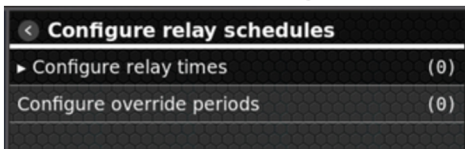

Navigate with
Arrow Keys

 SELECT

 BACK

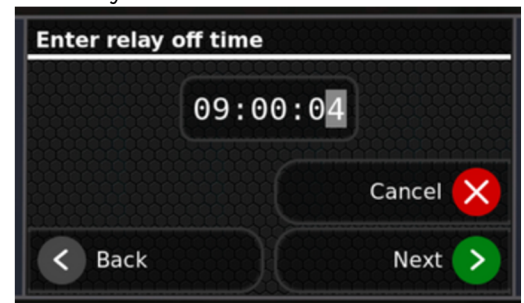

1. Select Configure relay times to add new or edit existing times, then Add relay time.

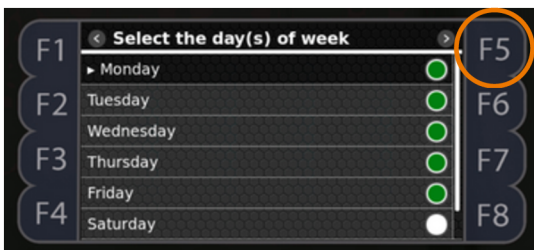

2. Enter the relay ON time, this will be when the bell starts

3. Enter the relay OFF time, this will be when the bell stops, usually this is in seconds.

4. Select the days of the week for this relay to be active. F5 is how you OK on this section.

5. Relay 1 should be selected, Press Next.

6. Review the relay schedule, and press next

7. The clock must be re-booted for the new bell schedules to take effect and trigger the relay. Use the Options Button, 1905, 1905, and select "Reboot Clock"

From the Bell Schedules screen you can add more times, or edit existing schedules. You can also use the "Configure Override Periods" to setup date ranges where the relay will not trigger.
